

# LEADING LEAN SOFTWARE DEVELOPMENT

WITH MARY AND TOM POPPENDIECK  
GLASGOW, 20TH & 21ST MAY 2010

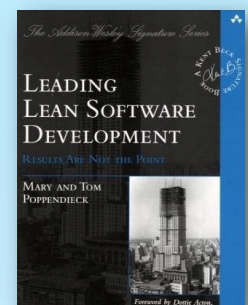

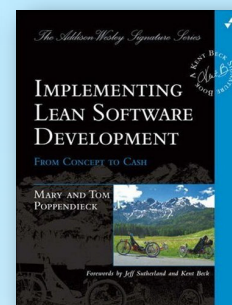

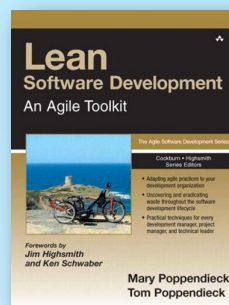

## You will Learn

- ➔ How to look at your process as a system and identify waste
- ➔ What's wrong with software testing and how to fix it
- ➔ How to frame risk and rethink scheduling so you can promise timescales with confidence
- ➔ How to increase the productivity of knowledge workers
- ➔ Tools for solving problems that everyone in the organization can use
- ➔ Beyond Budgeting principles, and how they affect system development
- ➔ The leadership roles that support the Lean framework

On their first visit to Scotland since 2006, American Lean Pioneers Mary and Tom Poppendieck are offering this unique course. It is aimed at managers from software development companies and IT departments who are interested in starting or improving their Lean or Agile software development initiatives.

Mary and Tom consult with companies large and small across the world and are excellent speakers who regularly top the bill at major international conferences and events.

This course is based on their latest book, *Leading Lean Software Development: Results Are Not The Point* which teaches software leaders and team members exactly how to drive high-value change throughout a software organization—and make it stick.
